

TidyContact

by 4Site Studios

We convert the addresses of your donors and activists into the U.S. Postal Service's CASS™ format to ensure that all your records are consistent and accurate.

How It Works

Our service is integrated into your page templates. When a supporter fills out a form on your site, the address gets cleaned up before the data gets sent to your CRM. The user never sees any of this, and we don't rely on autocomplete, so there's less abandonment on your activism and fundraising forms.

Features

- Standardize addresses from all countries
- Optional Zip+4 matching for U.S. addresses
- Retain a copy of original submitted address for auditing
- Optional geolocation (lat/long) of address

Lookup Pricing

U.S. Addresses

\$0.01

for Nonprofits
per Lookup*

**\$2,500 one-time setup fee.
\$0.10 per non-U.S. lookups.*
